

My Compliance Wizard (MyCW) is the only web-based compliance solution of its kind to offer immediate access to accurate and up-to-date, global and US compliance regulation details. It bridges a resource gap in planning for the medical meeting industry.

Made for Healthcare and Event Professionals

Navigate ever-changing cross-border compliance regulations and tackle time-consuming research to find laws, regulations and codes that apply to 196 different countries and 50 US states. MyCW was designed by industry experts to provide the latest country and state compliance information. And you'll be subscribed for your choice of daily or weekly updates.

How do we keep up to date?

We use both technology AND a team of researchers, familiar with the state of medical compliance codes. We've spent hundreds of hours locating hard to find data in multiple languages, then used the latest web technology to place "surveillance cameras" on all the places where updates appear. Our researchers are adding more cameras on a weekly basis, combing through the results and making sure that MyCW will actually become more comprehensive as time goes on

Use on any device

MyCW is suitable to be used on any computer or smart device, and is built to be an easily navigable, go-to repository to look up a country or state and immediately be presented with local planning information and access to the latest codes of compliance for healthcare professionals.

Features at a Glance

- *Automatic updates and notification when regulations change*
- *One click to access 14 code categories and text for quick interpretation*
- 196 countries and 50 U.S. states
